Pain Free Laser Hair Removal and How It Works!!!

We are proud to offer the latest in groundbreaking technology in laser hair removal. At The Laser Beautique we offer laser treatments using the revolutionary Soprano, which is the **GOLD STANDARD** 810nm diode laser for permanent hair reduction. It is the world's first effective laser hair removal system to be FDA approved as "painless".

Treatment benefits include:

1. Maximum comfort, minimum fuss
2. IN-MOTION™ technology allows for virtually PAIN-FREE laser hair removal without anesthesia or numbing gel
3. GOLD STANDARD 810nm diode laser gives superior, more predictable, more reliable results
4. Permanent hair reduction on all pigmented hair on all skin types (Asian and black skin types), including tanned skin, all year round
5. Suited to successfully treat Men and Woman Alike
6. Faster results which often mean fewer with clinic visits and fewer treatments are needed.
7. This translates into savings for you!

Other machines on the market are painful and have known to cause burning and scarring, which can sometimes be permanent.

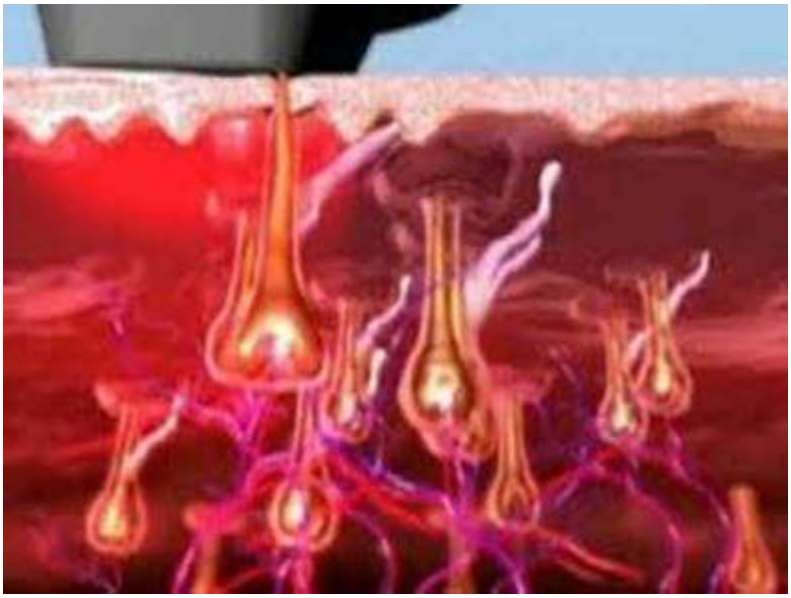
What makes this treatment Pain-Free?

What makes this laser treatment different from other treatments is that an 810-nm diode laser is utilized. Unlike previous generation systems, the energy from the laser is delivered via low fluence (energy) pulses at a rapid 10 pulse per second repetition rate. The temperature of the hair follicle containing the cells responsible for hair re-growth is raised slowly and the follicle is destroyed. This rise in temperature provides clients with deep dermal heating, a sensation that many users have compared to a soothing hot stone massage. This turns the otherwise uncomfortable process of hair removal into a very enjoyable one.

This revolutionary method of delivering low-level energy via a burst of rapid pulses is what enables Pain-Free yet Extremely Effective hair removal. By constantly moving the hand-piece during treatment, the energy is delivered uniformly, eliminating skipped spots and ensuring patient comfort.

In layman's terms, what makes the Soprano XL different from other painful lasers is that older, conventional type lasers use a high peak power via the pick and place method of treating which feels like an elastic band snapping on your skin. The laser therapist would zap and move and zap and move, with every zap, the treatment becomes more uncomfortable. At The Laser Beautique we use the Soprano's In Motion™ technology to gradually increase the power.

We like to compare it to having a hot bath. If you drawer a boiling hot bath and try and get in, you will burn yourself. BUT if you get into a warm bath and gradually increase the temperature of the water you can withstand even higher temperatures without feeling any pain or discomfort. We are therefore able to treat our clients more aggressively yet painlessly.



The Laser Beautique's Credibility

The Laser Beautique is a credible organization that has been founded, with 15 years of experience in the beauty and aesthetic market.

Results

For ultimate results, we recommend between 8 to 12 treatments, every 4 to 6 weeks- depending on the individual's hair growth, skin type and hormones etc.

Pain-free laser hair removal is a wonderful investment in yourself.

Do's and don'ts when undergoing laser treatment

1. When undergoing laser treatment one is not permitted to wax, pluck or mechanically remove hair from the root. The reason for this is that we need the pigment in your hair follicle to be present for the treatment to work. You can shave, trim or use depilatory creams between treatments. The perk of this, unlike with waxing, you don't need to wait for hair to grow.
2. Please do not moisturize, use essential oils or have a massage 24 hours before your treatment. This is because moisturizers, oils and massages will leave oil in the surface of your skin.
3. Please don't shave the day before your consultation or first treatment so that the laser therapist can assess your hair density and colour.
4. Once your therapist has assessed the area to be treated, please shave the area to be treated 24hours prior to your treatment

We offer all potential clients a free consultation and test patch. Please let us know when you are available for an appointment and we will be happy to schedule you in.
